**PHILIPS**  
sense and simplicity

# Highlights

## MySound

Sound perception is subjective and everyone has their individual listening preference, therefore MySound provides you with three distinctly different profiles in your choice of sound to give you the ultimate listening experience: Clear - for making the voices very crisp and clear Soft - for a more friendly and soft voice Warm - for making the voice sound welcoming and warm.

## Handset speakerphone

Handsfree mode uses a built-in loud speaker to amplify the voice of the caller, allowing you to speak and listen during a call without holding the phone to your ear. This is especially useful if you want to share the call with others or simply multitask.

## All calls from your home phone

You can now make and receive landline and mobile phone calls from your home phone. This product can connect up to two mobile phones to your home phone via Bluetooth connection for ultimate convenience. You can also synchronize your mobile phonebook to landline phone and to your computer.

## Low power consumption:< 0.65 W

Philips phones are energy efficient and are designed to be respectful to the environment. Now the power consumed in stand-by mode is less than < 0.65 W.

## Up to 60 min. recording time

Up to 60 minutes recording time

## Answering machine

Access all your messages directly from the base and the handset.

## make and receive landline and

Make and receive landline and cellphone calls from your home

## 6.1cm (2.4") TFT color display

Bigger, clearer and much sharper resolution displays allow you to effortlessly read the

characters on larger screens. This telephone has a 6 cm (2.4") TFT high-resolution display with an icon menu

## 200 name landline phonebook 500 name mobile phonebook

200 name landline phonebook 500 name mobile phonebook

## charges I-phone and mobilephon

Since the base station recognizes when the handset is docked on its base, an intelligent embedded system ensures transmitted power is permanently controlled and optimised according to the distance between handset and base unit. It means power emission is automatically reduced by up to 93% when the handset is near its base. When used in Eco Mode, you'll also enjoy a 60% manual reduction of emitted power.

# Specifications
